

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of the claims in the application:

**Listing of Claims:**

1-27 (Cancelled)

28. (New) A method, comprising:

sensing a directional movement of a computer system on a surface via a first movement sensor; and

adjusting information displayed on a display of the computer system, wherein the information displayed is independent from the surface, and the adjusting is correlated to the directional movement of the computer system.

29. (New) The method of claim 28, wherein the first movement sensor is an optical sensor or a mechanical sensor.

30. (New) The method of claim 28, wherein the directional movement comprises angular rotation of the computer system sensed by the first movement sensor and a second movement sensor;

31. (New) The method of claim 28, further comprising:

correlating the directional movement of the computer system to a cursor movement on the display of the computer system.

32. (New) The method of claim 28, further comprising:

sensing external pressure on a first section of the computer system toward a second section of the computer system, wherein the first section of the computer system comprises the display, the second section of the computer system comprises the first
